

4.2.8 Configure Dual Boot

Your Performance

Your Score: 2 of 2 (100%)

Elapsed Time: 40 seconds

Pass Status: **Pass**

Required Score: 100%

Task Summary

Actions you were required to perform:

- ✓ Change GRUB Menu GRUB_DEFAULT to Windows 10
- ✓ Reboot the operating system

Explanation

In this lab, your task is to:

- Change the default menu option for the GRUB2 boot loader to **Windows 10**.
- Use the **grub2-mkconfig** command to make the 30_os-prober script find the Windows 10 operating system on the external hard drive and add it as an entry in the boot menu.
- Reboot the machine and select the **Windows 10** option from the boot menu. Only the Windows 10 splash screen will display.

Complete this lab as follows:

1. At the prompt, type **vi /etc/default/grub** and press **Enter** to open the GRUB2 configuration file.
2. Press **i** to change to vi insert mode.
3. Change the third line of the file to **GRUB_DEFAULT=Windows 10**.
4. Press the **Esc** key to leave insert mode.
5. Type **:wq** and press **Enter** to save the changes.
6. Type **grub2-mkconfig -o /boot/grub2/grub.cfg** and press **Enter** to write the boot loader changes to the grub.cfg file.
7. Type **reboot** and press **Enter** to see the changes made to the GRUB menu.
8. Select **Windows 10** from the boot menu.
