**Score: 100%**

Passing Score: 80%

## ▼ Question 1:

✓ Correct

Which of the following commands searches man pages for a specific keyword? (Select THREE.)

- ☐ **help**
- ☐ **slocate**
- ➔ ☒ **apropos**
- ☐ **export**
- ➔ ☒ **whatis**
- ➔ ☒ **man -k**
- ☐ **find**

**Explanation**

To search the man pages, use the **man -k**, **apropos**, or **whatis** commands. The **whatis** database must be created prior to using these commands. Use the **makewhatis** command to build the database.

The **find** command searches for files based on file name, size, and other file attributes.

The **slocate** command searches for files based on file name, size, and other file attributes.

The **help** command displays information about the **builtin** command, but not from man pages.

The **export** command exports a shell variables for use by a child process.

## ▼ Question 2:

✓ Correct

You are working on a Linux system and need more information about the **uname** command. What would you enter at the command prompt to learn about the **uname** command syntax and options?

**Explanation**

To learn about the **uname** command syntax and options, type any of the following at the command prompt:

- **man uname** displays the man page for the **uname** command. A man page shows the command's syntax, options, and related files and commands.
- **info uname** displays the info page for the **uname** command. For GNU software, info pages are the primary documentation source. Info pages use hypertext links to navigate the pages.
- **uname --help** displays the on-screen help for the **uname** command. (For some commands, the **command -h** option displays on-screen help as well.) In most cases, help displays an abbreviated list that shows of the command syntax and available options with brief descriptions. If the command is typed incorrectly, many commands display the help information automatically.

## ▼ Question 3:

✓ Correct

Which of the following man page sections shows a list of options available for a Linux command and explains what the options do?

- ☐ TITLE
- ☐ NAME
- ☒ DESCRIPTION
- ☐ SYNOPSIS

**Explanation**

The DESCRIPTION section typically lists the options that are available for the command and explains their purpose and use.

The SYNOPSIS section shows a brief description of the syntax for using the command.

The NAME section gives the name of the command and a short description of what the command does.

The TITLE section shows the title of the man page and the section of the manual it is found in.
