Task Summary

Actions you were required to perform:

✔ Start the enp2s1 network interface card

Explanation

In this lab, your task is to:

Determine which network interface went down when it was unplugged.
Start the network interface from the command line.

Complete this lab as follows:

1. At the prompt, type one of the following commands and press **Enter** to view information about the network interfaces to determine which card is not up and to identify the card alias. (The alias for the network interface that is down is enp2s1.)

   ip addr
   ip addr show
   ip addr show enp2s1
   ifconfig -a

2. Type one of the following commands and press **Enter** to start the enp2s1 network interface:

   ifup enp2s1
   ip link set enp2s1 up
