Task Summary

Actions you were required to perform:

✔ Insert the powermate driver into the kernel

Explanation

In this lab, your task is to:

Use **lsmod** to verify that the device driver was not compiled into the kernel.
Insert the **powermate** module into the kernel.
Confirm that you have loaded the module into the kernel.

Complete this lab as follows:

1. At the prompt, type **lsmod** and press **Enter** to verify that the device driver was not compiled into the kernel.
2. Type **modprobe powermate** and press **Enter** to insert the module into the kernel.
3. Type **lsmod** and press **Enter** to confirm that the module was loaded into the kernel.
